Neue

The new era of
work chairs

@neuechair

www.neuechair.com

Introducing the **NeueChair**.

The NeueChair is engineered to be the ultimate modern computer chair—fully ergonomic, intuitive to use, comfortable—all combined into a stunning design to cater to any user who spends long hours seated at work.

In order to ensure maximum consistency, the NeueChair is manufactured on a semi-automated assembly line, with input from German automotive engineers to ensure a never-before-seen level of build precision in a chair.

This means every element on the NeueChair is made with unwavering finesse—for example, our premium 3-layer NeueMesh™ is produced

with consistent tautness using the ironing system from leading German industrial manufacturer VEIT Group.

We use only top-grade materials to ensure that each NeueChair not only looks stunning but is built for absolute durability.

Finally, the NeueChair is endowed with a sleek silhouette and full adjustability. We trust it to become your most accommodating, satisfying and elegant seating companion for productive long hours at the office or home.

Features

Ergonomic Adjustments.
Exceptional Build Quality.
12 year Warranty.

ControlShift™ Intuitive adjustments at your fingertips

Forget bending awkwardly and fumbling around to make adjustments to your chair—simply squeeze the ControlShift™ hand levers (located below the armrests) to adjust to your preferred height, or to lock/unlock the backrest tilt. It's simple and intuitive, as a chair should be.

Focus Mode For maximum productivity

Easily switch your seating position to 'Focus Mode' by sliding the seatbase inwards and pushing the backrest forward. This puts you in the most upright seating position with maximum ergonomic support, to keep you focused and supercharged to power through your work.

NeueMesh™ Uncompromising support and breathable

Our premium 3-layer mesh blend, precisely wrapped around the chair's polyamide frame, is rigorously tested and durable enough to hold and properly support you while keeping the seat breathable and easy to maintain.

Lumbar support Fully adjustable and tailored

The NeueChair's adjustable lumbar support system allows you to tailor the height and depth of the lumbar support, so you can find the perfect angle to fit the unique curvature of your spine.

PU-coated armrests Soft, sturdy contoured support

Our spacious armrests, made with a slight concave, will allow you to comfortably rest your elbows on them and take strain off your neck and shoulders. The padding material is also carefully chosen to be soft yet grippy, so your elbows don't get sore after long periods or slide off.

Class IV hydraulic piston Tested for safety and reliability

From SHS, the go-to choice for all premium task chairs. We've added an extra layer of protection (by carburizing) to further reinforce its long-term durability.

Designed for incredible comfort. Built for absolute durability.

The NeueChair comes in two variants, both stunning in looks and packed with the same ergonomic features.

Silver

With Polished ADC12 Aluminum
